Education

Tiruchirapalli, India

**National Institute of
Technology**

August 2017

- B.Tech in Computer Science and Engineering. GPA: 7.37

Experience

Software Engineering Intern

Updater Services Ltd.

May 2015 – July 2015

Chennai, India

- Built an android mobile application to authenticate users and capture data from work sites and send them to the server. Worked on Spring framework and Hibernate on the Java server to create customized APIs for the application. Worked on the backend of a Web Development project and queried data from databases using hibernate and modified the current APIs.

Skills

- Programming Languages: C, C++, Java
- Operating Systems: Windows, Fedora
- Packages: Android Studio, MS Office

Projects

- **Vortex '17 Android App** (<https://github.com/krishshyam/vortex>) Official mobile application for Vortex '17, the annual technical symposium of Computer Science Department of NIT Trichy Android, Firebase
- **Subtitle Downloader** (<https://github.com/krishshyam/Subtitle-Downloader>) Windows application written in python to categorically download subtitles of TV series using webscraping.
- **MyNotes** MyNotes is a “Notes and Reminders” with personalised push notifications and material design. Android, SQLite, Google Cloud Messaging
